# Hard Floor Maintenance

## Consistent Performance, Long-Lasting Shine

Every 3M™ Floor Pad is made to high quality standards. Ongoing innovation and advancements in technology make 3M™ Floor Pads more effective than ever. Each floor pad in 3M's full line is engineered specifically for a particular maintenance task. Uniform coating throughout every 3M™ Floor Pad helps produce a long, useful life, resulting in less pad usage. Plus 3M™ Floor Pads are washable and reusable. The polyester fibre used to make a range of floor pads\* will contain a minimum of 50% post-consumer recycled content. The recycled polyester fibre used is third-party certified for post-consumer recycled content.

**1-800-364-3577**

\*3M™ Brand Floor Pad families include 3200, 3300, 3400, 3500, 5000 and 5100.

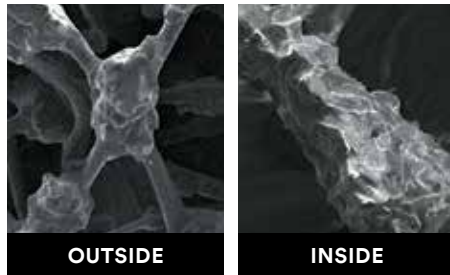

# 3M™ Floor Pads.

## A superior product you can rely on.

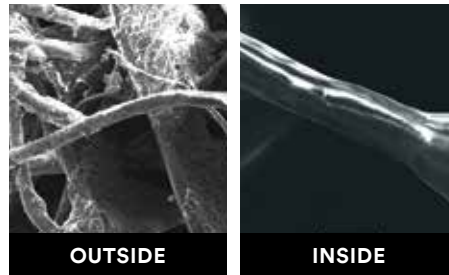

### All floor pads are not created equal.

The difference between floor pads may seem small, but when added up, they can make a big difference to your bottom line in terms of productivity and labour costs. Consider the following attributes of 3M™ Floor Pads that set them apart from the competition:

Uniform distribution of mineral abrasives throughout pad – not just on the surface – offers impressive performance and a long, useful life.

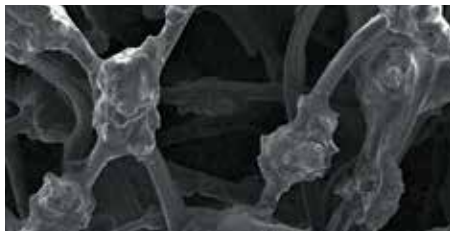

**3M™ Floor Pads**

**Other Floor Pads**

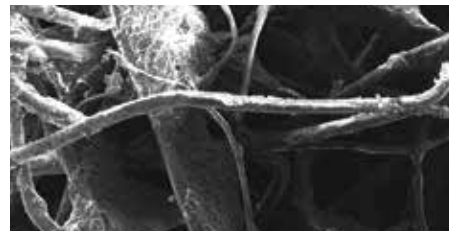

Individually separated and coated fibres help produce more consistent results.

**3M™ Floor Pads**

Fibres are uniformly coated with resin and mineral, producing more consistent, high-quality results.

Combination of highly conformable fibres help provide maximum pad-to-floor contact.

**Other Floor Pads**

Fibres are randomly coated with resin and mineral, which can produce inconsistent results.

Larger fibres are less conformable, providing fewer contact points with the floor.

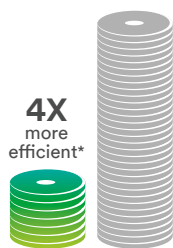

# Straight talk about floor pad sustainability.

3M™ Floor Pads not only last longer than a competitive product, meaning fewer end up in landfills, but also biodegrade at approximately the same rate. Take a look at how durable 3M™ Floor Pads can help you meet both your environmental and floor care goals.

## Longer-lasting floor pads equal fewer pads in landfills.

Durability makes a significant difference in a product's environmental impact. Years of scientific testing, and years of everyday use by our customers, prove 3M™ Floor Pads are durable. Besides reducing the costs of your floor care program, longer-lasting pads need to be replaced less often, meaning fewer floor pads go into landfills.

## Recycled meets durable.

Protecting the environment while ensuring your floors get the best care is a top priority for 3M. That's why we start with at least 50% post-consumer recycled materials<sup>2</sup> and then add high-performance, water-based latex resins to maximize pad durability and value.

## What about biodegradability?

There's been much discussion about biodegradability in floor pads. Tests by independent, third-party researchers show 3M™ Floor Pads biodegrade at approximately the same rate as our competitors'.<sup>1</sup> 3M believes that durability is a better way to sustainability and doesn't compromise floor pad performance.

## We invented floor pads.

3M invented floor pads more than 50 years ago to help cut the costs of floor care. Today, we continue to develop products that anticipate the needs of floor care professionals through science-based research and a commitment to sustainable products that meet both our customers' facility maintenance and environmental goals.

<sup>1</sup>In a comparison of 3M stripping pads versus a competitive stripping pad.

<sup>2</sup>The recycled polyester fibre used is third-party certified for post-consumer recycled content. 3M™ Brand Floor Pad families 3200, 3300, 3400, 3500, 5000 and 5100.

<sup>3</sup>Through testing performed by the same independent, third-party laboratory and using the same ASTM D5511 test method as the competition, we've found that 3M floor pads biodegrade at approximately the same rate as our competitors.

# Dust, Scrub & Shine with the 3M™ Easy Clean System

## Trap More Dirt. Use Less Time.

The 3M™ Easy Trap Duster System uses specially designed disposable dusting sheets to trap 8X more dirt, dust and sand than conventional flat-fringed cotton dust mops or a competitive sweeping dust cloth brand.

## Cleaner Floors with Less Effort

Save time and money with more efficient mopping. The 3M™ Easy Scrub Flat Mop's low drag, easy manoeuvrability and lightweight handle help cleaning crews get the job done faster. The 3M™ Easy Scrub Plus Flat Mop is specially designed for uneven surfaces.

## Quick Change for Swift Mopping

Swap cleaning products in a snap with the 3M™ Easy Scrub Express Flat Mop System. Interchangeable bottles of cleaning fluid attach to the mop's handle and can be quickly switched out for different jobs. The portable 3M™ Easy Scrub Express Caddy keeps cleaning solutions organized and handy.

## More Shine in Less Time

The 3M™ Easy Shine Applicator System shines floors to a high gloss. Low-drag 3M™ Easy Shine Applicator Pads deliver finish quickly and evenly. The system's refillable backpack pouch and lightweight aluminum handle with trigger-button dispenser help save cleaning crews' time. The 3M™ Easy Shine Fill Station enables quick refilling of the backpack pouch at the work site, cutting down trips to the janitorial closet. The 3M™ Easy Scrub Plus Flat Mop shines uneven surfaces.

# Safer Floors, Safer People

## Be Prepared

In Canada, over 44,000 workers are injured annually due to falls. 66% of these falls are slips and trips on the same level.\* The cost to your company as a result of these incidents can be as much as \$59,000 per injury.† Stairways, ladders, ramps, entryways, walkways, parking lots, factory buildings, machinery, showers and dressing rooms are all potential areas of risk. Many of these risks can be prevented by implementing simple floor-level safety measures.

3M™ Nomad™ and 3M™ Safety-Walk™ Matting has been certified by the National Floor Safety Institute (NFSI) as providing a "high traction" backing. NFSI tested these 3M™ Mats using its NFSI 101-C Test Method for Measuring Dry Transitional Coefficient of Friction (TCOF) of Floor Mat Backing Materials and found each mat to have a TCOF of greater than 0.05. According to NFSI, mats lacking the high-traction backing offered by 3M™ Matting are more prone to movement, which can increase the risk of migration, buckling and curling, which, in turn, can contribute to slip, trips and falls.

# 3M™ Safety-Walk™ Slip-Resistant Tapes and Treads

3M™ Safety-Walk™ Slip Resistant Tapes and Treads Series 300, 500 and 600 have been certified by the National Floor Safety Institute (NFSI) as providing "high-traction." A wet static coefficient of friction (SCOF) of greater than 0.60 was chosen by NFSI as the criteria for "high traction" because according to NFSI, floor surfaces maintaining this level of slip resistance when wet have proven to reduce slip-and-fall claims by between 50% and 90%.

## 3M™ Safety-Walk™ Slip-Resistant Conformable Tapes and Treads — 500 Series

A high-friction, mineral-coated, slip-resistant material with a special pressure-sensitive adhesive backed aluminum film designed to conform around corners and adhere to irregular surfaces. Ideal for use on diamond grade safety plates, steps and other irregular surfaces.
