

HydroPower® RO XXL

Quality Tools for Smart Cleaning

Fully Integrated Trailer System with Reverse Osmosis Filter and 650l Water Tank

HIGH PERFORMANCE AT A GLANCE:

- Automatic flush function helps to prevent scaling and pollution of the RO membrane and prolong its lifetime.
- Pure Water tank capacity 650l
- 1 or 2 man operation via 2 hose reels and 2 x 12V (10 bar, 150 psi) pumps.
- 2 high quality 100m hoses for optimal reach.
- High value stainless steel hose reels, rust resistant. Safety function to block the reels during the drive.
- Pure water output up to 250l per hour.
- Digital controller monitors water flow, pressure and battery power.
- Control water flow manually or by wireless remote control (max. reach 100m in open area).
- 3 stage water purification production with dedicated 12V (10 bar, 150 psi) pump. (Carbon Pre-filter, RO Membrane and HydroPower® DI Filter Polisher).
- Integrated TDS meter.
- High capacity 12 Volt battery offers 'all day' operation before requiring recharge.
- Maintenance free 210 amp hour AGM battery with mains charger supplied.

MOBILITY:

Suitable for vehicles with towing capacity of 1.500kg. High capacity baffled tank integrated into lightweight chassis for easy towing. DOT road specification, single axle, integrated lights and indicators with brake assist. Supplied with european standard coupling, jockey wheel and manual parking brake. Conforms to EU regulations.

AUTOMATIC FLUSH FUNCTION:

• Extended lifespan of the membrane:

An automatic 5 minute rinse at the start of the water filtration process flushes out impurities and helps to keep the membrane clean which significantly extends its service life.

• Reduced DI resin consumption:

Optimised membrane performance results in higher purity of the water passing through the DI filter and therefore extends resin lifetime.

Simplified membrane care:

The conservation liquid is rinsed out from the membrane automatically, saving time and effort it would take you to do this manually.

SAFETY:

The multi-chamber tank design with low centre of gravity is designed to maximise stability during transportation. Also includes Auto Shut Off features, activated during water production mode when the tank becomes full and during use when the TDS of the outgoing water measures 5ppm (can be changed to lower or higher number).

FLEXIBILITY:

The flow rates for Wash and Rinse modes can be adjusted anytime at the digital control panel. This allows the operator(s) to choose more or less powerful flow rates to suit the cleaning job, saving and conserving water when less intense water flow is needed. You can also switch between Wash and Rinse modes at the touch of a button using the wireless remote control.

 Total flexibility for producing and transporting 100% pure water for water fed pole cleaning!

CONVENIENCE:

Integrated storage compartment fits up to 6 water fed poles up to 1,91m long, with side storage areas for brushes, safety signs and other accessories.

PROTECTION:

Optional protection cover for the hose reels. Robust truck tarpaulin that can be fixed on the new fixing point at the trailer frame.

UNGER HydroPower® RO XXL.

Picture	Product	Part No.
	HydroPower® RO XXL Trailer cpl.	TRLR1
	HydroPower® RO XXL Protection cover	18845

Every HydroPower® RO XXL includes the UNGERHydroPower® DI Filter, a deionisation filter that is the final

part of the purification process after the water has passed through the RO membrane. Packed with the latest design innovations, HydroPower® DI Filters exceed standard DI filter efficiency, performance, workflow and comfort thanks to these new features:

FastLock Opening

enables you to open and close the filter vessel quickly and safely, with minimum effort.

QuickChange Resin Bags speed up the filter empty/ refill process by up to 10 times* in comparison to standard DI filter systems.

FloWater Technology

The innovative water distribution system ensures more efficient water flow through the entire vessel, improving resin efficiency and increasing its lifetime.

®When applied with a water fed pole system such as **nLite®**, pure water is the most efficient way of cleaning at heights of up to 20m safely from the ground. Typical applications include residential or commercial window cleaning, large areas of glass, building facades, vehicles, signs and solar panels. Light, modular and easy to use, our nLite® System sets a new benchmark in professional cleaning technology. The use of modern materials delivers perfect balance between weight and rigidity.

nLite water fed poles

With 6 grades of pole material to choose from, the **nLite®** System is the perfect choice for every cleaning challenge and

nLite water fed brushes

Superlight brushes feature high quality polyester or natural bristles designed to get into the smallest corners and help with scrubbing actions. Choose a 27cm, 40cm or 60cm version, with up to 12 different jet locations, depending on the brush

Mix and match interchangeable, quick release Pencil or Fan Jets to create the optimal spray pattern for a specific

nLite Goosenecks

Strong carbon fibre gooseneck attachments enable you to create any working angle for hard to reach areas, keeping weight to a minimum. Modern carbon fibre material ensures long life and high rigidity.
