

## TWIXTER SYSTEM

The superior concept of the Twixter cleaning system can be applied universally. It offers a functional, ecologically and ergonomically convincing and technically reliable solution for all surfaces. Cleverly designed right down to the last detail, Twixter optimises your work processes. With the double-sided cover, you can complete wet and dry wiping in just one operation. Every second cover change is cut out; furniture no longer has to be moved. This cuts down on ground covered in transit, on time and on washing costs.

## AT A GLANCE

### Surface coverage 30–40 m<sup>2</sup>

Double the coverage of conventional flat mopping systems

### Best cleaning results

Clean thanks to intelligent 2-phase cleaning with one mop

### Saving on time and costs

With the double mop, every second mop change is cut out

### Ergonomic

All work steps are carried out standing upright

### Safety for daily cleaning

Wet and dry mopping in one work step

### Particularly practical

Greatest possible manoeuvrability thanks to double joint attached to the side

### Areas of application

- General cleaning
- Disinfectant cleaning
- 1-step and 2-step cleaning
- Medium dirt levels

### Site

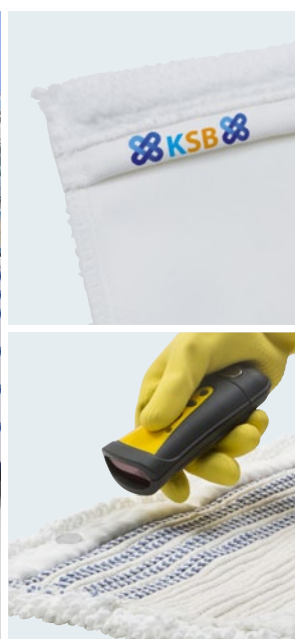

Hospital / Nursing home • Office / Administration • Large areas (Airport, Exhibition)

### Methods

Twixter-Press • Des tub • Pre-Wash • Dry cleaning • Cleanjet • Spray method • Pour method

## VERMOP® INDIVIDUAL

Individual colour printing on mop e.g. with your customer's logo is available.

We would be pleased to sew the RFID tags for our MopLog Medi-Tex control system, or for your own RFID logistic system, into our covers.

## TWIX SYSTEM

For small, heavily-furnished areas in particular, VERMOP has launched the double mop system with a reduced working width of 30 cm. The Twix 30 cm holder features all the advantages of the large version such as no-touch rinsing, wringing and discarding of the mop.

With Twix, floor cleaning is made easy and simple. The compact, practical holder glides over the floor and reaches easily into corners and crevices. Small and heavily-furnished areas such as shops, WC facilities or kitchenettes can be cleaned quickly and effortlessly. In combination with the wide range of covers for different types of floor, Twix 30 cm guarantees outstanding cleaning results.

## AT A GLANCE

### Ideal for small heavily-furnished areas

Double mop with reduced working width of 30 cm

### Best cleaning result

Clean thanks to intelligent 2-phase cleaning with one mop

### Saving on time and costs

With the double mop, every second mop change is cut out

### Ergonomic

All work steps are carried out standing upright

### Safety for daily cleaning

Wet and dry mopping in one work step

### Particularly nifty

Greatest possible manoeuvrability thanks to double joint attached at side

### Areas of application

- General cleaning
- Disinfectant cleaning
- 1-step and 2-step cleaning
- Medium dirt levels

Hotel • Office / Administration • Small areas (Shop, Doctors' surgeries)

### Methods

Twix-Press • Des tub • Pre-Wash • Dry cleaning

## VERMOP® INDIVIDUAL

Individual colour printing on mop e.g. with your customer's logo is available.

We would be pleased to sew the RFID tags for our MopLog Medi-Text control system, or for your own RFID logistic system, into our covers.

**Double-sided mop**

One cover – two functions. Wet mopping with the blue side and dry mopping with the white side - simply turn the holder.

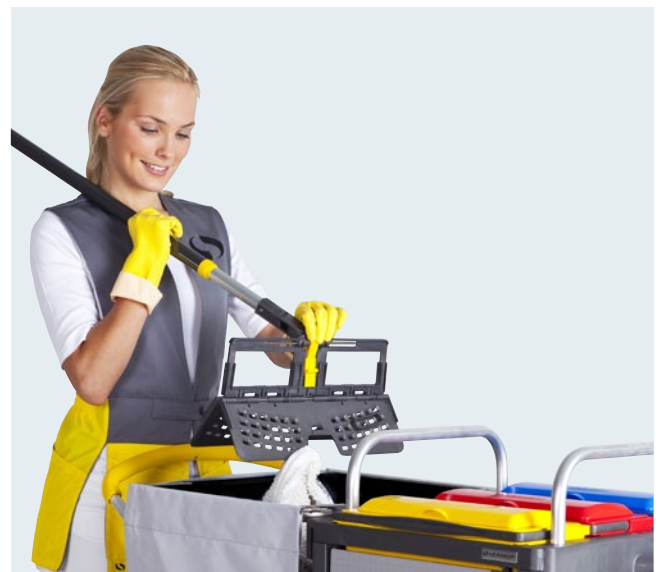

**Ergonomical and hygienic**

Upright attachment of the covers, fast and simple in six steps. Hygienic as no contact with mop.

**Efficient**

Thanks to the two sides, every second mop change is done away with, cutting down on unnecessary trips and saving time.

**Discard mops without bending**

By pressing the finger switch, the mop is discarded hygienically and without exertion.

### Manoeuvrable holder

The handle joint attached to the outside makes working easier. A double joint means that the holder is particularly manoeuvrable e.g. for cleaning stairs.
